## *Analysis of COVID-19 Infection Rate in NYC Jails*

### Coronavirus Infection Rates as of July 17, 2020

Table 1<sup>1</sup>

Locations:	COVID-19 Cases*	Population	Infection Rate	Infections/ 1,000 people
People in DOC Custody**	294	3,928	7.48%	74.85
DOC Staff	1,418	10,977	12.92%	129.18
DOC Total	1,712	14,905	11.49%	114.86
New York City	219,032	8,175,133	2.68%	26.79
New York State	405,551	19,440,469	2.09%	20.86
United States	3,626,881	331,002,651	1.10%	10.96
*last updated	July 23, 2020 2:13pm, data as of July 17, 2020			
** This is not the cumulative number of cases of people who have contracted COVID-19 while detained in NYC jails. See our daily analysis report for more information on the limitations of the data provided by the Department of Correction.				

The rate of infection among people who work for and who are incarcerated by the NYC DOC remains much higher than New York City, New York State, and the United States.

Table 2

NYC DOC Comparisons	
People in DOC Custody and DOC Staff have an infection rate X times higher than:	
	X
New York City	4.29
New York State	5.51
United States	10.48

<sup>1</sup> This number does not reflect the total number of people who have contracted COVID-19 while in DOC custody, as it does not include those who have been released, transferred, or who have died in DOC custody. The population of people in DOC custody changes daily, with an average of 35 people released per day and 27 people admitted per day since April 1, 2020. See Table 5.

July 17, 2020

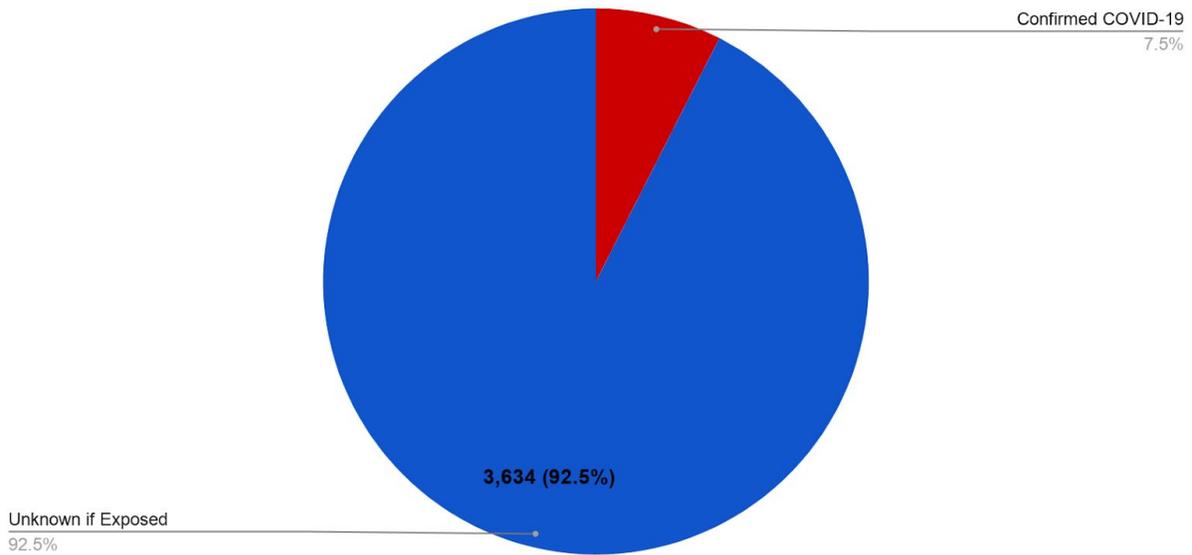

**COVID-19 Exposure of Current Population in DOC Custody**

Table 3

<b>People in DOC Custody</b>	
Likely Exposed but Asymptomatic	0
Confirmed COVID-19	294
Unknown if Exposed	3,634
Percent of Incarcerated Population Likely Exposed or Confirmed COVID-19	7.48%

Table 4

COVID-19 Exposure of Current Population in DOC Custody

July 17, 2020

**Turnover in NYC Jails**

Table 5

	Total	Average/ Day	Likely and Confirmed Exposed
<b>Individuals Released from DOC custody since 4/1</b>	3,276	35	992
<b>Individuals Admitted to DOC custody since 4/1</b>	2,591	27	784
<b>Total Number of People in DOC Custody since 4/1/2020</b>	7,204	3,990	2,180

**More than 3,000 people were likely exposed to the virus while in DOC custody since April 1, 2020.** This does not include DOC staff or community spread of people likely exposed when coming into contact with DOC staff or people released from DOC custody.

**NYC DOC Infections Since April 1, 2020, Compared**

Table 6

NYC DOC Infections Compared with NYC and New York State

The curve for people incarcerated by DOC may look like it is “flattening”, but this reflects the fact that the City is only reporting the number of COVID-19 positive people who are still in custody that day. As people with COVID-19 are released from DOC custody, new COVID-19 diagnoses are replacing those who have been released. On the other hand, the number of infections in the comparator populations - DOC staff, NYC, and New York State - are cumulative. Absent cumulative data from DOC, the rate of infections among DOC staff is likely a better proxy of the true rate of infections among those in DOC custody, as both populations are in frequent contact.
